

2nd International Meeting
on New Strategies in
Bioremediation Processes

24-25th
October
2019

PORTO | PORTUGAL

Almeida Garrett Library
Crystal Palace Gardens

SPECIAL ISSUE

International Biodeterioration &
Biodegradation Journal
ELSEVIER

Abstract submission deadline

May 24, 2019*

*Only submissions for poster sessions will be accepted after this deadline, and those abstracts will not be included in the Book of Abstracts.

SUBMISSION

<http://conference.mercatura.pt/events/bioremid2019/>

TOPICS

Identification and monitoring of pollutants
Degradation of contaminants of emerging concern
Bioremediation of priority pollutants
New technologies in biotreatment
New biodegraders and consortium-based strategies
Anthropogenic impacts on the microbial communities
Mathematical models for bioremediation processes
Waste recovery

REGISTRATION

		with Social Event
Early (≤ Sept. 15)		
Regular :	180 €	260 €
MSc or PhD Students:	110 €	190 €
Late (> Sept. 15)	250 €	330 €

CONTACTS

For registration, submission and payments: geral@mercatura.pt

Other topics:
bioremid2019@fe.up.pt

CONFIRMED SPEAKERS

Angeles Prieto-Fernández
Phytotechnologies for metal rich and contaminated soils: potential role of plant associated bacteria

Balbina Nogales
Marine microbial communities facing hydrocarbons: victims, survivors and opportunists

Concepción Calvo
Biodegradation and absorption technology for hydrocarbon-polluted water treatment

Cristina Queda
The challenges of composting bioresources aiming soil amendment

Elisabet Aranda
Fungal bioremediation of pharmaceutical active compounds

Federico Aulenta
Novel electrobioremediation strategies for cleaning up sediments contaminated by petroleum hydrocarbons

Madalena Alves
A wide perspective of carbon materials as catalysts for bioremediation of micropollutants and methanogenesis

Maria Reis
Prevention of environmental pollution through the conversion of organic wastes into bioplastics

Philippe Corvini
Bacteria feeding on antibiotics - A good or bad news?
